

## **Estre Ambiental files a request for Judicial Recovery**

**SÃO PAULO, July 31, 2020** – Estre Ambiental S.A. hereby communicates the filing on last Wednesday of a request for the company’s Judicial Recovery (JR) before the São Paulo Court of Justice.

The company believes that the filing of the JR is the most appropriate instrument to enable the protection of its business, its assets, its creditors and its social duty as an employer towards its employees.

With such measure, the company hopes to renegotiate its debts, face investments and the economic crisis experienced in recent years, accentuated by the pandemic scenario that worsened the company’s institutional, financial and operational situation, doing so without compromising the continuity and quality of the activities, operations and services provided.

Therefore, Estre demonstrates that it continues to make every effort to optimize its liquidity and normalize its capital structure, with the objective of a definitive restructuring, enabling the maintenance of jobs and the creation of sustainable value in the interest of society and other parties interested in such an important segment for public health and the environment.
